

WE OFFER THE FOLLOWING CPN AUTHORIZED TRAINING CLASSES ON A REGULARLY SCHEDULED BASIS IN SOUTHERN CALIFORNIA.

1. NUCLEAR GAUGE CERTIFICATION TRAINING CLASS
(Scheduled monthly)

The CPN AUTHORIZED NUCLEAR GAUGE OPERATOR TRAINING CLASS is a one day program on the SAFE and LEGAL use of portable density and moisture gauges containing sealed source radioisotopes.

The class presents the following topics in easy to understand terms.

- Principles of radiation safety and health physics
- Principles of nuclear physics relating to moisture
And density measurements
- Licensing and compliance with regulatory requirements
- Transportation and shipping
- Field service and maintenance
- Gauge operation and field practice

This class satisfies the training requirements of the NRC and Agreement States for the use of portable nuclear gauges used for construction and agricultural testing. A Certificate of Completion is given to each individual who successfully completes the class.

This class begins at 8:00 AM and concludes by 4:00 PM. All necessary training materials are included for the Class. The class fee is \$165.00 prepaid or paid at the beginning of the class session.

2. RSO SEMINAR
(Scheduled quarterly)

This seminar is designed specifically for Radiation Safety Officers and manager who possess portable density/moisture gauges under a radioactive materials license. Those attending receive a binder to file all RSO materials to insure compliance with the regulations and be prepared for inspection by the licensing authorities. License inspectors or reviewers from Agreement or NRC are invited to attend. Discussion of individual situations is encouraged.

The class fee is \$160.00 prepaid or paid at the beginning of the class session. The class begins at 8:00 AM and concludes by 12:00 PM. All training materials are supplied. A Certificate of Completion is issued to each individual in attendance.
